### DETAILED ACTION

1. This office action is in response to the Appeal Brief filed January 07, 2008.  
Claims 1-23 are currently pending in this application.

### *Election/Restrictions*

2. Claims 1 and 14 are allowable. The restriction requirement, as set forth in the Office action mailed on December 10, 2004, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 8-13 and 19-23 are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Allowable Subject Matter***

3. Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly suggests or shows all of the limitations as claimed. Specifically,

Re claims 1 and 14, none of the prior art of record discloses, in combination with other limitations as claimed, a reflective-transmissive type LCD device and a method of fabricating the same comprising a pixel electrode including a transparent electrode connected to the output terminal of the thin film transistor through the contact hole disposed on the organic insulation layer, and a reflective electrode disposed on the transparent electrode, having an area less than the transparent electrode and defining a first region of the transparent electrode, a portion of the transparent electrode being exposed without being covered by the reflective electrode defining a second region, the second region of the transparent electrode including a first boundary and a second boundary, wherein the first boundary is a boundary between the first and second regions and the second boundary is an exposed edge of the transparent electrode; and an orientation film coated on an upper surface of the pixel electrode and having an orientation groove rubbed in a first direction from the first boundary toward the second boundary, the orientation groove preventing impurity from being stacked at the first boundary of the transparent electrode.

The most relevant reference, US 6,452,654 B2 to Kubo et al. (Kubo), fails to disclose or suggest an orientation groove rubbed in a direction from the first boundary between the first and second regions towards the second boundary being an exposed

edge of the transparent electrode, the orientation groove preventing impurity from being stacked at the first boundary of the transparent electrode. As shown in Figs. 2 and 4, Kubo discloses a similar reflective-transmissive type LCD device comprising a pixel electrode 1 including a transparent electrode 21 and a reflective electrode 23 disposed on the transparent electrode 21, having an area less than that of the transparent electrode and defining a first region 22 (reflective region) of the transparent electrode 21, a portion 20 of the transparent electrode 21 being exposed without being covered by the reflective electrode 23 defining a second region (transmissive region), the second region 20 of the transparent electrode 21 including a first boundary and a second boundary, wherein the first boundary is a boundary between the first region 22 and the second region 20 and the second boundary is an exposed edge of the transparent electrode 21. However, Kubo is silent as to a rubbing direction relative to this exposed edge.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
